

Python Interview Questions and Answers for Freshers

1. What is Python?

Python is a high-level, interpreted programming language known for its simple syntax and readability.

2. What are the key features of Python?

Easy to learn, interpreted, object-oriented, dynamically typed, large standard library, and cross-platform support.

3. What is the difference between a List and a Tuple?

Lists are mutable (can be changed) and use square brackets []. Tuples are immutable (cannot be changed) and use parentheses ().

4. What are common Python data types?

int, float, str, list, tuple, set, dict, and bool.

5. What is a function in Python?

A function is a reusable block of code that performs a specific task and is defined using the 'def' keyword.

6. What is a dictionary in Python?

A dictionary is a collection of key-value pairs used to store data values.

7. What is a lambda function?

A lambda function is a small anonymous function defined using the 'lambda' keyword.

8. What is the difference between == and is?

'==' compares values while 'is' compares whether two variables refer to the same object in memory.

9. What is exception handling?

Exception handling allows you to handle errors using try, except, finally blocks.

10. What is OOP in Python?

OOP stands for Object-Oriented Programming. It includes concepts like classes, objects, inheritance, polymorphism, encapsulation, and abstraction.

11. What is the use of the break statement?

The break statement is used to exit a loop immediately.

12. What is the use of the continue statement?

The continue statement skips the current iteration of a loop and moves to the next iteration.

13. What is PEP 8?

PEP 8 is the official style guide for writing clean and readable Python code.

14. What is *args and **kwargs?

*args allows passing multiple positional arguments and **kwargs allows passing multiple keyword arguments to a function.

15. What is a module in Python?

A module is a file containing Python code (functions, variables, classes) that can be imported and reused in other programs.
